Travel in time through our glass...

RENAISSANCE  
GLASSWORKS

# *The infinite quest for excellence*

Renaissance Glassworks is an avant-garde manufacturer of luxury glass products. We are proud to offer our customers unique state of the art and high quality glass bathroom and kitchen items. The techniques we have developed over the years allow us to deliver elegant, nicely designe vessels, basins, mirrors, vanities, tiles, shower enclosures, kitchen backsplashes and countertops, as well as unlimited possibilities of customized architectural and decorative products of your own creation.

This catalogue is filled with newly designed products, allowing customers to have more options to satisfy their decorative needs. A technical information section is included to provide you with the basic knowledge needed to help you feel more confident when selling Renaissance glassworks products. The catalogue is also designed to expand with future collections and products.

All of Renaissance glassworks' products are compatible with American and international plumbing standards. Each order is carefully prepared and all Renaissance employees are dedicated to ensuring that you are entirely satisfied with our products.

We welcome all architect, designer, and personal custom projects. Our product development team will assist you in producing a one-of-a-kind glass piece of art you will enjoy.

**Alain Ross**

President & CEO, Renaissance Glassworks

## **Durability and care of glass sinks**

**Durability :** All RENAISSANCE GLASSWORKS glass sinks are sturdy and made of highly resistant glass, are scratch resistant, stain resistant, will not lose their discoloration, are easy to clean, and are fully recyclable. Each sink goes through thermal shock quality control, before being shipped. However, users should avoid pouring scalding hot water or ice water into a glass sink. The sudden temperature changes that result cause "thermal shock" and may cause the glass to crack or shatter. Once cracked, the entire glass sink should be replaced.

Our professionally made glass sinks resist breakage due to small accidents, such as dropping a brush or small objects into the basin. However, a heavy object can shatter a glass sink, just as if it were a porcelain sink.

**Care:** The RENAISSANCE GLASSWORKS glass sinks are tough enough to withstand everyday wear and remain as beautiful as the day they were purchased, when treated properly. They require no more special attention than a standard porcelain sink. If water spots occur, a solution of vinegar and warm water will dissolve the spots.

**WARNING:** Never use an abrasive cleaner of any kind on your glass or hardware. Many components are coated with a clear lacquer that will be irreparably damaged if subjected to harsh chemicals or scrubbing devices.

**Installation:** The use of a professional plumber is recommended for sink installation. Most breakage occurs during installation. **The drain and faucets on a glass vessel sink should only be hand-tightened.** Glass sinks should never be installed where indoor temperatures are unregulated, because wide temperature variances can cause thermal shock and breakage.

# Accessories

**Model #: POP001**

**Description**

1 1/4" push-in pop-up waste connector with or without overflow

**POP001**

June 2015

Chrome	Brushed nickel, satin gold, gold
